

PROJECT DESIGN PHASE II

REQUIREMENT ANALYSIS

DATE	02 Nov 2023
TEAM ID	2DE609BEACAAFDA93DC492429FF2BCB3
PROJECT NAME	Pizza Delivery App

Requirement analysis:

Analyzing a pizza delivery app is crucial for its success in a competitive market. To begin, understanding the target audience and competition is essential. Next, assessing the app's features and functionality, including user registration, menu customization, and payment options, helps ensure a seamless ordering process. User experience and design aspects, such as UI, performance, and mobile responsiveness, play a pivotal role in retaining customers. Technology and security should not be overlooked, as data protection and scalability are paramount. Examining the app's business model, revenue streams, and cost structure is vital for long-term sustainability. Legal and regulatory compliance, as well as user feedback and reviews, should guide continuous improvements. Finally, considering future development and maintaining a competitive edge are key to thriving in the pizza delivery app industry. This ongoing analysis will help the app adapt to changing market dynamics and evolving customer preferences.
